Well checkups are important, too

Preventive visits, sometimes called well checkups, are medical checkups that help you stay healthy. Preventive visits can help your PCP get to know you and your health needs. This helps them find health problems early, when they're easier to treat.

Georgia Health Check program

Babies and children get a lot of well checkups. This helps them get a good start in life. During a Health Check visit, your child will get things like:

- A height/weight check
- Immunizations (shots)
- Tests for tuberculosis (TB), lead and other health problems
- Eye and ear tests
- Physical exam
- Nutrition review
- Tips about safety and health

We cover preventive visits for children and adults from any doctor who works with our plan. You don't need a referral for preventive visits.

You may need help finding a PCP for your child. If
